

MBS Direct continues to be Harker's online book provider. However, for upper school students taking the chemistry courses listed below, **Cengage Unlimited** must be purchased through the publisher's (Cengage) website. Students taking the mathematics courses below have the option of purchasing the Cengage Unlimited Subscription, which is recommended; you may also purchase the text through MBS Direct or another source. Cengage Unlimited is a digital subscription that provides the user with access to Cengage's entire library of over 14,000 textbooks, online assessments, and study tools.

Harker requires that you purchase a one-year subscription for \$179.99 if your student is taking at least one of the chemistry courses below in this upcoming school year (2021-22). For calculus students taking any of the below courses, the math department recommends purchasing Cengage Unlimited, but you may purchase the text if preferred.

- \*Precalculus (Regular/Honors/Core)
- \*Honors Calculus C
- \*AP Calculus (AB & BC)
- \*Honors Multivariable Calculus
- \*AP Chemistry
- \*Chemistry (Regular & Honors)
- \*Organic Chemistry

The Cengage Unlimited Subscription also includes the ability to rent at least four hardcopy textbooks for only \$7.99 S&H for each text. Once you have activated your Cengage Unlimited subscription, you might want to look for available textbooks for other courses you are taking in 2021-22 that you would prefer to rent rather than purchase.

If your student is also planning on taking one of these other courses next year (2022-23), you might want to consider purchasing the two-year subscription for \$239.99. There is a possibility that Harker will have more courses that use Unlimited in the 2022-23 school year.

Please remember to **purchase only Cengage Unlimited as it gives you access to the Homework platforms**, i.e., OWLv2, while *Cengage Unlimited eTextbooks* does not.
